Technical Skills

- **Backend Engineering:** Java, Spring Boot, Microservices Architecture, REST APIs, OOP, Design Patterns (SOLID).
- **Cloud & DevOps:** AWS, Terraform, Docker, Kubernetes, CI/CD pipelines.
- **Testing & Quality:** Unit, Integration & E2E Testing (JUnit, Mockito), TDD practices.
- **Software Engineering Practices:** Clean Architecture, Scalable System Design, Hexagonal Architecture, Agile/Scrum.

Soft Skills

- Technical leadership and team support
- Clear communication with cross-functional teams
- Efficient prioritization and delivery under tight deadlines.

Language

- **Arabic** : native language
- **French** : Full professional capacity
- **English** : Professional competence

Certification

- Managing Machine Learning Projects with Google Cloud.
- Getting Started with AWS Machine Learning, Certifié par Amazon Web Services (AWS).
- Data Science Math Skills, Certifié par l'université Duke.
- Big Data Engineer, Certifié par IBM.
- IoT Cloud Developer, Certifié par IBM.
- Artificial Intelligence Analyst, Certifié par IBM.

PROFILE

Software Engineer with 4 years of experience designing and delivering scalable microservices architectures. Strong expertise in Java and the Spring ecosystem, object-oriented design, and design patterns. Experienced in building event-driven systems, implementing robust testing strategies, and working with cloud infrastructure.

Professional Experience

Software Engineer

4Digital — Tangier, Morocco | Jun 2022 – Present

- Designed scalable microservices with Java & Spring Boot, applying OOP and design patterns.
- Built production-grade REST APIs with Spring Data JPA, Security, and Dependency Injection.
- Implemented event-driven architectures using Apache Kafka for distributed communication.
- Provisioned AWS infrastructure (EC2, S3, RDS, ECS, ECR) via Terraform (IaC).
- Contributed to Agile/Scrum ceremonies: code reviews, sprint planning, system design.

Software Engineer

Upwork Freelance | Oct 2021 – May 2022

Production Projects

- **maraqi.app | EdTech Platform — Live** : Engineered a global EdTech platform serving 20,500+ students across 90 countries, building scalable microservices to support 200+ concurrent live sessions with zero downtime and optimized performance under peak traffic.
- **occo.ma | E-commerce Platform — Live** : Built a cloud-native e-commerce integration platform enabling real-time Odoo ERP synchronization, leveraging event-driven microservices and Kafka to ensure reliable, scalable data exchange across core business domains.
- **datafas.app | SaaS Platform — Live** : Engineered a multi-tenant SaaS platform with microservices architecture, optimizing inter-service communication and system performance while enforcing strong data isolation and role-based access control.

Education

2016 - 2021 Diploma of State Engineer in Computer Science, software and intelligent systems specialty.
Faculty of Science and Technology, Tangier, Morocco.
